

**GOVERNMENT OF GIBRALTAR**

**CENSUS  
OF  
GIBRALTAR  
1991**

## FOREWORD

Under the powers vested in the Governor by Section 3(1) of the Census Ordinance I was appointed on the 17th September 1991 to be Commissioner to take the Census of Gibraltar as specified in the Census Order.

The Order required that the Census shall be in respect of all persons resident in Gibraltar on the night of Monday the 14th October 1991.

The arrangements were made in pursuance of this Order and the census was taken on the appointed date. The results are contained in this Report which I have the honour to submit in accordance with Section 5 of the Census Ordinance.

I wish to record my appreciation of the work of the British Forces in Gibraltar and Messrs. I. Chellaram, A. Collado, J. Pinero and C. Polson in ensuring a successful census. I also express my thanks to the enumerators and coders and to J. Desoisa and his computer staff for the excellent processing of the Data. It is with pleasure I again include R. Garcia's paper on the history of the censuses since 1753.

Finally I acknowledge the co-operation given by householders in completing the census schedule.

H.A. Fell  
Census Commissioner

## INTRODUCTION

The population census of Gibraltar can be defined as the process of collecting, processing and publishing demographic, economic and social information in respect of all persons in the country at a specified time. The fact that it includes all persons, unlike a sample survey which covers only a percentage of the population, and that the data collected are so comprehensive means that the cost of the operation is relatively expensive. Why, then, do most countries in the world undertake a census at fixed intervals, usually every ten years?

First, the statistical information obtained from current and earlier censuses gives an historical picture of the demographic, economic and social changes which have taken place over the period. Second, and when supplemented from other statistical sources (employment surveys, household budget surveys, national accounts, etc) the census is the base for estimating and forecasting of the future needs of the community in regard to education, health, man-power requirements, housing and economic and social development.

In democratically elected countries it is not only the government which seeks to meet the needs of the community. Industrial and commercial enterprises, trade unions, research institutes and religious and social organisations all play a part, possibly the dominant part, in supplying and satisfying the demands of the community. These organisations and institutions should find the census tables of interest to them.

## 1991 CENSUS PLANNING AND ORGANISATION

On the 19th September 1991 an Order of the Governor in Council was issued under Section 2 of the Census Ordinance requiring a census count to be taken of all persons present in Gibraltar on the night of Monday 14th October 1991.

For convenience in the distribution and collection of the census forms persons were classified under four main headings, viz:-

1. Families of British servicemen.
2. (a) Servicemen in the Gibraltar Regiment and their families living in quarters or barracks, and  
(b) United Kingdom based civilians and their families.
3. (a) Residents living in institutions such as hotels, hostels, hospitals, prisons and old peoples homes, and  
(b) Persons living on boats.
4. Members of households not included in groups 1 to 3 above.

The Services, as in previous censuses, agreed to accept responsibility for the collection of data in respect of groups 1 and 2. A total figure only of the number of persons present on census night was required for group 1. The census forms had to be distributed and completed for all individuals in group 2.

Group 3, being a heterogeneous group, presented special problems. A large proportion of the Moroccans live in hostels and many work late at night and are difficult to contact. The majority cannot speak or read English or Spanish and interpreters had to be appointed. Care had to be taken that persons in hospitals, prison, or homes were not counted also by their families or relatives. Decisions

had to be made whether persons living in boats were residents or visitors. To ensure an accurate count of this group a census officer was appointed to supervise the distribution and collection of the census forms.

Group 4 covered individuals living in houses and flats and included most of the population. Gibraltar was divided into 68 enumeration areas; most areas had the same boundaries as in the 1981 census. Comparison of the area populations between the two censuses will provide useful information on internal population movements.

An enumerator was allocated to each area and he or she was given a map of the area and the latest available list of the addresses which fell within its boundaries. Enumerators were instructed in their duties, the census questions were scrutinised in detail, and anticipated problems were discussed (see "Instructions to Enumerators", Appendix I). In the 1981 census the enumerators were mainly from the civil service, in the 1991 census they were mostly senior pupils from the Bayside and Westside schools.

In early October publicity for the census was given by the press, television and radio. Enumerators were told to begin delivery of the Census Forms and the Notice to Householders (see Appendices II and III) on Monday 7th October. Advertisements in the press asked persons who had not received a form to telephone or call at the census office. The collection of the completed forms began on Tuesday 15th October and continued for a week. Most forms were collected and returned to the office by Saturday 19th October. A check revealed that a number of forms had not been returned, and the enumerators were requested to go back and collect them. This reduced the outstanding schedules to a small number, and revealed that several buildings had been demolished, turned into offices or shops, or were vacant. Finally a letter was posted to all outstanding addresses drawing the householders attention to the fact that he or she was required by law to complete and return the form immediately or face the possibility of a fine. Only a few householders failed to return the form, and these, it is believed, included mainly those who were on holiday and not present in Gibraltar on census day. October was chosen for the census because it was known that few people would be away.

The editing and coding of the schedules was begun on 22 October 1991 and was completed within three weeks. Editing revealed that some questions on the schedule had not been answered (ages, occupation, etc, omitted) and the answers to some questions were vague. Most omissions and queries were settled by a telephone call (households were asked on the census form to give their telephone numbers) but some required a return visit to the household. The coded schedules were collected by the Government Computer Centre on the 13 November 1991. The information was computerised and the final printouts were produced early in May 1992.

#### POPULATION OF GIBRALTAR

The definition of the population has remained unchanged from 1961. This ensures continuity and comparison with earlier years.

Population & Persons Present in Gibraltar, 1970, 1981, 1991.

	<u>1970</u>	<u>1981</u>	<u>1991</u>
Gibraltarians	18,873	19,825	20,022
Other British	3,001	3,706	3,811
Moroccans	2,798*	2,140	1,798
Other Nationalities	-	808	1,072
	24,672	26,479	26,703

	<u>1970</u>	<u>1981</u>	<u>1991</u>
Wives & Families of servicemen	2,161	2,265	1,371
Visitors & Transients	1,132	872	1,010
Total of persons present on census night	<u>27,965</u>	<u>29,616</u>	<u>29,084</u>

\* the figure in 1970 of 2,798 includes Moroccans and other Nationalities.

Servicemen, it will be noticed, have not been included in any of the censuses. Their wives and families and visitors and transients are included in 'Persons present in Gibraltar on census night' but are excluded from the 'Population'. The service families are only in Gibraltar for a limited period of time and their welfare (education, health, housing, etc) is mainly the responsibility of the UK Ministry of Defence (M.O.D). Visitors and transients are also excluded.

Some reservation has been expressed about the small figure of the Moroccan population in 1991. This figure does not tally with that estimated by the Immigration Department.

## DEFINITIONS AND CLASSIFICATIONS

### 1. Nationality

Most of the tables in this report show the characteristics of the population under four main nationality headings: Gibraltarian, Other British, Moroccan and Other (Non-British). Countries have different nationality laws and the rules and regulations are often quite complicated. Most people have no difficulty in stating their nationality, but a few have problems. As an example, take a family consisting of husband and wife, son and daughter. The husband is British, has a valid British passport and was born in the United Kingdom. The coding of his nationality would be "Other British". His wife was born in Gibraltar and is also a descendant of a male person, father or grandfather, born in Gibraltar and is registered, or entitled to be registered, as "Gibraltarian". The wife can declare herself as "Other British", through marriage, or as "Gibraltarian" under Part 1, Section 6, of the Gibraltarian Status Ordinance (1964 Edition). Both are correct, but for the purposes of this census, "Gibraltarian" should be coded. The children, one born in the UK and one in Gibraltar are, unless registered as 'Gibraltarians', the same nationality as their father.

In this, as in the two previous censuses, a person resident and born in Gibraltar was accepted as "Gibraltarian" if it was so stated on the form. Such a procedure can result in errors, though the number will be relatively small.

### 2. Occupation and Industry

With only a few minor amendments the occupational classification in this report is identical with that used in the census of 1981. Both are based on the International Standard Classification of Occupations published by the United Nations. The minor changes relate to "Foremen, chargehands and supervisors, n.e.c.," and to "Labourers and unskilled workers, n.e.c." In 1981 these workers came under the major heading "Miscellaneous", whereas in the 1991 census they are to be found under "Production, construction, and transport workers, etc".

The 1991 industrial classification has been revised so that it is compatible and comparable with the Employment Survey. In consequence, the figures for some

industries are not comparable with those published in the 1981 census. In 1981 shipbuilding and repairing, marine engineering, sea-transport and shipping services and ports and services were coded as one industry. In 1991 this wide ranging industrial group has been dismantled and classified under a number of different headings. Shipbuilding and repairing and marine engineering, although now of negligible size is classified as an industry in its own right. Sea transport and shipping services and ports and services are now a sub-heading under transport and communications and H.M. base is classified under public administration and defence. In 1981 the M.O.D. military hospitals, schools, etc., were classified under their appropriate headings whereas now all M.O.D. activities are included in public administration and defence. The transport section of the Public Works Department (P.W.D.) has been transferred from construction to transport and communications. The broad classification 'services' in the 1981 census has been divided into two groups, repairs of consumer goods and other services (entertainment, hairdressing, laundries, religious services, etc.,).

The re-classification of industry does not, however, affect manufacturing; wholesale and retail trade; hotels, restaurants and bars; banking and finance, etc.

Table 12 gives details of the number of full-time workers employed in the private and public sectors of the economy. Recently the Government has undertaken a number of joint ventures with the private sector. Following the procedure in the Employment Survey all employees in these enterprises are included in the private sector.

The census schedule included a question asking if a person was employed, unemployed or other, and a note was included explaining the terms. Unfortunately, many individuals who completed the forms had failed to read the note, and housewives, retired persons and even children were entered on the schedule as unemployed. The task of contacting the households in order to correct the data was not possible. The unemployment figures shown in Table 7 have been taken from Government sources as at 30 September 1991.

### 3. Qualifications

The 1981 census included a question asking each individual to state the qualification(s), if any, which he or she possessed. The answers revealed an extremely wide ranging set of qualifications covering CSE grades and "O" levels, professional qualifications and higher university degrees. The task of allocating the many varied qualifications to specific headings proved very difficult. It was realised then that a new approach would be needed at the next census.

For the 1991 census it was decided that information on vocational qualifications only should be asked for, and the question on qualifications should be restricted to persons in employment. Qualifications were classified under a number of headings, as for example, science, medicine, arts, education, etc and the individual was asked to enter a tick in the appropriate box. A note described which qualifications fell under the different headings.

Most people are vain in some way and some express it by exaggerating their qualifications or their occupation. This happens in all countries and Gibraltar is no exception. Given that there is a strong correlation between occupation and vocational qualification it is difficult to believe that the persons in some occupations had, for example, a qualification in science, engineering and mathematics. Admittedly, there are known cases of persons with university degrees working as waiters, labourers, etc,. The data is useful but should be treated cautiously.

Although the notes clearly stated that a person should tick the box for

education only if he or she possessed a certificate, diploma or degree in education, many ignored this - presumably they were indicating that they had received an education. The qualification is considered to be relevant only for those persons whose occupations are teachers or administrators in the education system.

#### 4. Housing

Tables showing the distribution of households by types of dwelling, tenure, number of rooms, facilities, etc, make sense in regard to houses and flats but little sense in regard to institutions such as hotels, hostels, hospitals, etc. The analysis in consequence has been restricted to householders living in houses and flats, referred to earlier in this report as Group 4. This group also excludes the families of servicemen and UK based civilians who are housed in M.O.D. quarters.

The Housing Ministry stated that it desired more detailed information than was provided in 1981. To meet the request the tables relating to Government and private rented housing have now been extended to provide statistical information for Government rented, pre-war; Government rented, post-war; private rented, pre-war controlled; private rented, pre-war decontrolled; and private rented, post-war. In addition the Ministry has been given the data by enumeration area - this information is not published.

A number of householders were unable to state clearly whether their dwelling was controlled or decontrolled. This should be borne in mind when studying the relevant tables.

#### 5. Accuracy

No population count in any country can claim to be one hundred per-cent accurate. Always, a few individuals will avoid being enumerated. However, because, as described in the section "Planning and Organisation" every effort was made to find and count every individual. It is believed that few persons were missed and that the count attained a high standard of accuracy.

In spite of every endeavour and careful editing and checking of the census questionnaires errors are missed. Special computer cross-checks were introduced to eliminate, as far as possible, inconsistencies. For example in the last census a number of Government executive officers were shown as being employed in the private sector.

Attention has been drawn in the text about the accuracy of the tables on qualifications and controlled and de-controlled dwellings. With these reservations the information set out in the tables is considered to be of good quality and reliable.

### ECONOMIC: CHANGES IN EMPLOYMENT - 1970 TO 1991

Some significant events have taken place between the censuses of 1981 and 1991 and have been reflected in the size and distribution of the labour force.

In 1970 and 1981 the frontier between Gibraltar and Spain was closed, and persons who worked in Gibraltar lived in Gibraltar. In December 1982 Spain partially opened the border but on a restricted basis, on the 15th February 1985 it was fully opened. Persons who were resident in Spain could now cross the border for employment, and, it will be seen, many did. The lower rents of houses and flats in Spain were an incentive for persons in Gibraltar to move to Spain. There was, however, a strong deterrent to these movements. Queuing at the frontier could be frustrating and to qualify for education in Gibraltar a child's parents had to live in Gibraltar.

In 1985 the Naval Dockyard was closed with the resultant loss of jobs. The commercial shipbuilding and repairing organisation which succeeded it fell into difficulties and later closed down. Fortunately a new firm has taken over this activity, but with a smaller workforce.

The running down of the military establishment began in the mid eighties and accelerated towards the end of the decade.

In spite of these changes and set-backs Gibraltar has responded with a number of new projects. Land reclamation has increased the area by about one-sixth, with extensive additions to office space and housing. Gibraltar is now aiming at becoming a world-wide financial centre. Furthermore, the labour force between 1981 and 1991 has risen.

The tables which follow in this section are denoted by T1, T2, etc. to distinguish them from the main tables in this report.

#### FRONTIER WORKERS

As stated above many individuals have taken advantage of the opening of the frontier to commute from Spain to Gibraltar for employment. The figures are set out in Table T1. A frontier worker is defined as an employee who is normally resident in Spain and is employed in Gibraltar.

Table T 1

Number of Frontier Workers by Sex, Sector & Nationality, April 1991

(source: Employment Survey)

Nationality	Official			Private			Total		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Gibraltarian	9	-	9	44	59	103	53	59	112
UK	1	5	6	373	277	650	374	282	656
Moroccan	-	-	-	10	6	16	10	6	16
Spanish	-	1	1	799	62	861	799	63	862
Other EEC	-	-	-	49	18	67	49	18	67
Other	-	-	-	-	-	-	-	-	-
Total	10	6	16	1286	428	1714	1296	434	1730

The total labour force employed in Gibraltar is 14,040 of which 12,310 are resident in Gibraltar and 1,730 frontier employees. Thus 12.3% of the total labour force commute from Spain. The highest proportion of frontier workers are Spanish, 50%, with the high figure of 38% from the UK and 6% Gibraltarian.

#### ECONOMICALLY ACTIVE

The economically active population of Gibraltar includes all persons living in Gibraltar who are in full-time and part-time employment or are unemployed and seeking work. The economically active in specified age groups divided by the total numbers in those age groups gives the activity rates and these are shown in Table T2.

Table T 2

## Percentage of Population Economically Active, by Age Groups

Year	15-24		25-54		55-64	
	M	F	M	F	M	F
	%	%	%	%	%	%
1970	86.8	57.5	98.0	49.4	90.2	36.5
1981	78.8	57.2	98.9	44.4	91.2	25.6
1991	62.3	57.4	97.5	59.4	78.0	27.9

Immediate attention is drawn to the consistent decline in the rates for males in the age group 15-24. The ending of the MOD apprenticeship scheme and the willingness of pupils to continue their education and obtain better qualifications rather than leave school as quickly as possible must be pertinent in explaining the decline. The Education Department reported that in 1981 there were 99 students on scholarships abroad, in 1991 the figure had risen to 307. The marked rise in 1991 in the rate for females, aged 25 to 54 is partly the result of the growing increase in part time work and the rapid growth in banks and other financial services which are large employers of female labour. The sharp fall in 1991 in the rate for males, age 55-64, may be accounted for by the decline of the older industries such as shipbuilding, ports, docks, etc.

## OCCUPATIONS

Although table T3 does not give frontier employees by occupation, (the information is not available), it is nevertheless possible to gain an insight into the changes which have taken place.

Table T 3

## Employed Persons by Major Occupations

Major Occupation	1981			1991		
	M	F	T	M	F	T
Professional & Technical	909	550	1459	1046	677	1723
Admin & Clerical	1761	1197	2958	1593	1784	3377
Sales	660	585	1245	786	800	1586
Services	983	1058	2041	991	1026	2017
Production, Construction & Transport	4952	98	5050	3319	107	3426
Miscellaneous	59	11	70	171	10	181
Frontier Employees	-	-	-	1296	434	1730
Total	9324	3499	12823	9202	4838	14040

Few of the frontier workers, it is believed, are in occupations associated with production and transport, but the Employment Survey of April 1991 shows that 586 Spanish workers were employed in construction. The table reveals a marked increase in the numbers employed in the professional and technical, administrative and clerical and sales occupations.

PUBLIC AND PRIVATE SECTOR

Table T 4

Estimated Employment in Public & Private Sector: 1981 & 1991

Year	Private			Public			Total		
	M	F	T	M	F	T	M	F	T
1981									
Full-time	3941	1265	5206	5287	1325	6612	9228	2590	11818
Part-time	96	513	609	-	396	396	96	909	1005
Total	4037	1778	5815	5287	1721	7008	9324	3499	12823
1991									
Full-time	4242	1860	6102	3506	1276	4782	7748	3136	10884
Part-time	158	791	949	-	477	477	158	1268	1426
Frontier	1286	428	1714	10	6	16	1296	434	1730
Total	5686	3079	8765	3516	1759	5275	9202	4838	14040

On the above table all the figures for full-time workers are taken from the census reports, but the distribution of part-time workers between the private and public sector was not available. To distribute the part-time workers between the two sectors estimates had to be made based on the ratio of private to public weekly paid employees which was obtained from the Employment Surveys.

Bearing in mind the figures are estimates it is noticeable from the table that there has been a marked movement from employment in the public sector to employment in the private sector; public sector down by just over 1,700 and private sector up by nearly 3,000. In the public sector the brunt of the fall was felt by male employees. In the private sector males and females alike benefitted from the rise in employment.

The figures for total employment are also of interest. Employment in 1981 was 12,823 and in 1991 had risen to 14,040, an increase of 9.5%. However, whereas the number of females in employment went up by 38%, the figure for males fell by about 1%.

HOUSING

Tenure

Table T 5

Houses and Flats by Tenure, 1970, 1981 and 1991

Year	Owner-Occupied	Government Rented	Private Rented	Total
1970	209	3629	2189	6027
1981	361	4503	2063	6945
1991	1152	4694	1758	7604

The most noticeable change over this period is the increase in owner-occupied houses and flats, and especially the marked rise between 1981 and 1991. Even this substantial increase will be overtaken by the end of 1992 when the new developments at Westside I, Westside II and Brympton are completed and fully occupied. Part of these new developments was only possible with the reclamation of new land. It is also worth noting the decline in the number of private rented houses and flats over the period 1970 to 1991, and the small increase in the number of Government rented.

### Obsolescence

The period of construction, pre-war and post-war, should give an indication of the adequacy or inadequacy of the existing housing stock (Householders were asked to classify pre-war dwellings which had undergone major re-construction and improvement as post-war). Information on the period of construction was not requested in 1981, so no comparisons can be made. However, in 1991 35% of the rented accommodation was built pre-war.

Inadequacy and obsolescence are closely related to the availability of basic facilities. Over the period 1981 to 1991 there have been improvements. For example, in 1981 775 households stated they shared a toilet, in 1991 the figure had fallen to 362. In 1981 173 households were without potable water, in 1991 the figure was 29. Reductions have also taken place in the number of households without a bath or shower; 786 in 1981 but 222 in 1991.

Householders were asked to state whether their present dwellings would become vacant when they moved into the new developments at Westsides and Brympton; 424 answered that their residence would become vacant. The greater availability of accommodation could stabilise or even reduce rents and together with the attraction of home ownership could encourage persons who have moved into Spain to return to Gibraltar.

### Overcrowding

There will always be a grey area where persons will disagree about whether overcrowding occurs or not. But 102 households with 3 persons or more occupying one room is, without doubt, a clear cut case of overcrowding (see Housing: Table 3.1.). Tables 3.1. to 4.6. reveal many cases where overcrowding exists.

### Travel to work

The method of travel to work will be partly dependent on where a person lives and if he owns a car where he can park it. Presumably if the place of work is some distance away from home an individual is likely to use his car, motor-cycle or moped or bicycle or go by bus. Thus internal movements of population will affect modes of travel and provide new problems for the traffic department. Areas which have gained in population, 200 persons or more, are enumeration areas (areas of residence) 02, 13, and 57 - the description of these areas is to be found in Appendix VI and another five areas have increased between 100 and 200. No area has declined in population by 200 or over, but 4 areas have shown a fall of between 100 and 200.

Table T 6

Method of Transport to Work: 1981 and 1991

Year	Car or Van	Motor-Cycle or Moped	Bicycle	Bus	Foot
1981	4907	306	218	602	6431
1991	3605	2255	118	266	6057

Most people still go to work by foot, but the use of a car has declined (down by about 1,300) and that of the motor-cycle and moped increased markedly from 306 in 1981 to 2,255 in 1991. Travel by bicycle, bus and foot has fallen.

### DEMOGRAPHIC ANALYSIS

#### Population Growth

Table T 7

Population by Age Group and Changes between censuses

Row	Age Group	1970	1981	1991	Change 1970-81	Change 1981-91
					%	%
1	0-14	5662	5674	5442	-	-4.1
2	15-64	16688	17847	17682	6.9	-0.9
3	65+	2322	2958	3579	27.4	20.1
4	Total	24672	26479	26703	7.3	0.8
		%	%	%		
5	(1)+(4)	22.9	21.4	20.4	-	-
6	(2)+(4)	67.7	67.4	66.2	-	-
7	(3)+(4)	9.4	11.2	13.4	-	-
8	(1)+(3)+(4)	32.3	32.6	33.8	-	-

The population has risen between 1981 and 1991, but only by 0.8%. This small rate of growth, however, masks some important underlying changes. In the age groups 0 to 14 and 15 to 64 the population has fallen by 4.1% and 0.9% respectively, but there has been a sharp rise of 20.1% in the older age group, 65 and over. The figures in rows 5, 6 and 7 of the table further emphasise these movements. There is a steady decline in the percentage figures over the period 1970 to 1991 for the age groups 0 to 14 and 15 to 64 but for the age group 65 and over the percentage figure has moved from 9.4% to 11.2% to 13.4% in 1991. Gibraltar is experiencing, as are many countries, an ageing population with its implications for pensions, social benefits, hospital services, etc.

#### Mortality

In a small population with a small number of deaths each year it is customary and wise to base calculations of mortality rates on the average number of deaths over a number of years. The rates in the calculations which follow are based on the average number of deaths in 1989, 1990 and 1991. It is of interest that the averages for the past three, five and ten years are 252, 253 and 257 respectively and in 1991 the number was 258.

#### Infant Mortality

Over the past three years there have been only six infant deaths, three males and three females; an average of one male and one female death a year. The figures of infant mortality rates for both males and females are about 5.7 per 1000; among the lowest in the world.

## Life Expectancy

The deaths, very few, relating to visitors and deaths at sea were excluded from these calculations. As noted above the deaths under the age of one are negligible and only four deaths were recorded over the past three years for persons in the age groups 1 to 29. In the age groups under 55 for men and under 65 for women the age specific death rates remained under 10 per 1000.

Table T 8

Abridged Life Table: 1991

Age (x)	Males Expectation of Life at age x	Females Expectation of Life at age x
0	73.4	80.4
1	72.8	79.9
5	68.8	75.9
10	63.8	70.9
15	58.9	65.9
20	53.9	60.9
25	49.0	56.0
35	39.3	46.3
45	30.0	36.6
55	21.1	27.2
65	13.4	18.4
75	8.0	12.4

The expectation of life at birth for both males and females is high and for females the rate is among the highest in the world. These life expectancy figures compare with those of 71.4 for men and 75.5 for women at the last census. Gibraltar is obviously a very healthy place to live in.

## HISTORICAL: GIBRALTAR CENSUSES SINCE 1753

### THE EIGHTEENTH CENTURY

Each census of the past can give a most fascinating insight into aspects of Gibraltar's history. The details that are recorded, and the years when a census was taken, afford a glimpse of how the Rock's population arrived in Gibraltar and how it grew and developed.

The taking of a census in Gibraltar dates to before the eighteenth century. However, the earliest census of the whole civilian population which has survived is that of 1753. The results then were: British 434; Genoese 597; Jews 575; Spaniards 185, and Portuguese 25.

By 1767 the census divided the population into three categories: British and Protestant; Roman Catholics; and Jews. That was to remain the standard classification for the rest of the 18th century. The 1767 figures cover the civil inhabitants "within the walls or out at Landport". The total then was 2710 - 467 British, 1460 Roman Catholics and 783 Jews.

Ten years later, in 1777, the census became more complex. Not only did the abstract list the three religious categories; the population was now divided into those of "British Blood" and those of "Alien Blood", and further subdivided into "Natives" and "Not Natives". The total figure was then 3201, of whom 506 were Protestant (all of "British Blood"), 1832 were Roman Catholics (all except 13 of whom were of "Alien Blood") and 863 were Jews (all of "Alien Blood"). 1334 of the inhabitants were natives.

The original 1777 list is still extant. It was taken at Major General Boyd's command in February. The most interesting category is that of the Roman Catholic inhabitants, as it lists the country of birth of each person. These are the figures:

English and Irish	13
Minorkeens*	62
Natives	845
Genoese and Savoyards	672
Portuguese*	93
Spaniards	134
French	13

\* These are the spellings of the original list.

The 1777 census book contains an alphabetical listing of all the inhabitants by religion - first British and Protestants, second Roman Catholics and third Jews.

The information recorded per person was the surname, first name, age, country of birth (and hence the nationality of the person), occupation, years in the Garrison and remarks. The Scots today would probably object vehemently to the description of their country as recorded in 1777: North Britain! This, of course, was the result of the rebellions in the North which resulted in the eliminating of the word Scotland from all official documents.

Some of the occupations recorded are quaint: there was one oysterman, there were mantua makers, hucksters, sutlers, patrons (i.e. boat skippers), soil carriers, lamplighters, lime burners and a "Teacher of the Italian". The remarks column shows that the census was updated as a record of the population of Gibraltar. This was done after the Great Siege of 1779-1783, when it was necessary to know how many people had survived or returned. Thus one finds little snippets of information such as "Dead", "gone and returned", "Kill'd by a shell", "Deserted during siege to the Enemy", "Taken Pris<sup>r</sup> by the Span<sup>ds</sup>", "order'd away", "flogg'd out for a rape".

Perhaps one of the most fascinating details is the commencement of the list of the Jewish inhabitants of 1777. It reads:-

Aboab Isaac	65 born:	Tetuan	Merchant	57 yrs in Gibraltar
Aboab Hannah	50 born:	Gibraltar	Wife	-
Aboab Simha	28 born:	Tetuan	"	15 yrs in Gibraltar

This detail shows that English law, which forbids bigamy, was not yet fully operative on the Rock.

The next count recorded was in 1787. The population had increased then by 185 to 3386, of whom 512 were British, 2098 were Roman Catholic and 776 were Jews. Within four years, however, there was a sharp drop in the population. John Raleigh the Civil Secretary issued the following notice, dated 8 February 1791, in both English and Spanish:-

"The Governor thinking it proper that a correct list of the present Inhabitants and Residentiaries in the Garrison shall be immediately made out; Therefore the Inhab<sup>ts</sup> and residentiaries of every country and class are hereby required to send into this Office forthwith the names and numbers of each house, family and habitation, including children, servants, tenants, undertenants and lodgers, distinguishing their age, place of nativity and occupation, term of residence and by what Governor or Commander in Chief's permission each foreigner came here.

The Governor likewise requires the number of Mules, Burros, Horses, Cows, Goats and Sheep at this time in the inhabitants possession: These

returns may be dropt into the letter Box address'd to the Secretary, and the Governor hopes there will be no omission".

In addition, at the time, supplementary lists were also made. Examples are the list of Inhabitants Houses of 1778 and the list of Garrison Seamen of 1792.

#### THE NINETEENTH CENTURY

The earliest nineteenth century census that has survived is that of 1814. It reveals a trebling of the population to 10,136. The main reason for this was that during the Napoleonic wars, Gibraltar was the only port open in Europe for the passage of British goods to other European countries. This naturally attracted a large merchant and trading population.

The 1814 figure of 10,136 would have been even greater had it not been for the fact that about three-fifths of the population was wiped out by the yellow fever epidemic of 1804, and again more than one-tenth of the population died in the 1813 epidemic. These epidemics point to the overcrowding and poor housing which were recorded in detail in a later census.

That the 1814 population was largely composed of recent arrivals is indicated by the breakdown of the figure: only 1191 people were of British birth of origin and only 1851 were native Christians of alien origin. The great majority of the recent arrivals came from Genoa.

The early nineteenth century saw several other sudden decreases in population due to epidemic. Thus, there is a note in the Colonial Secretary's book, "In 1828 the Garrison became overcrowded and was devastated by a 'fearful epidemic'". Nevertheless, the police count for 1829 indicated a total civil population of 16,394.

This period, then, saw the development of the police counts. Gibraltar was divided into different areas and registers were kept of the inhabitants of the various districts. These registers recorded all arrivals and departures.

The 1834 census was based on the police districts. The Census Commissioner was then the Police Magistrate, and he was empowered to appoint five Assistants or Enumerators. The count of the population was no longer a complete alphabetical list by religion, but a listing by the areas where people lived.

#### FROM 1868 TO 1899

The modern census dates from 1868, when "The Census of the Population Ordinance, 1868" was enacted. This laid down the basis for the decennial census. These census

reports, beginning with the 1871 census, were now printed for easy accessibility.

The 1878 census records that "Aliens" were allowed into Gibraltar on 1st and 2nd class Permits and with Fishermen's Badges. These latter remind one that up to 1840 the fishermen of the Genoese fleet would be based at Catalan Bay for the duration of the fishing season. At that time, there was no road leading to Catalan Bay and there was no easy access except by sea. The companies of fishermen would erect temporary shelters on the beach for the duration of their stay, or they would live in caves. Naturally, some fishermen stayed on even after the season ended. By 1878, of course, there was already a permanent village at Catalan Bay.

One of the tables missing from the 1878 report is the one covering the population of the convict establishment. This is because the establishment was disbanded in 1875, thirty years after its foundation, when convicts were no longer sent out to Gibraltar from the United Kingdom. The establishment was 552 strong in 1871. At its peak, it numbered about 900. Convict labour was used to build part of the existing Line Wall, the white stone sea wall that was built close to or on top of the older Spanish and Moorish sea walls. Some of the convicts were released after their sojourn in Gibraltar, others were sent on to Australia.

The 1878 population tables divide the civil population into four districts: the Town; the Rock; the South; and North Front and Catalan Bay. These enumeration areas were gradually to increase in number.

1891 is the next key date. For the first time, the census covered the Port and Harbour, including the people living on board the stationary craft in the Bay e.g. Hulks, Pontoons and Lighters. They numbered 759 out of a Civil population of 19,100. The Military population was then 5,896.

At this time, it was the Registrar of Births who acted as Census Commissioner, a situation which remained unchanged until the 1951 census. In his 1891 report, the Registrar - James C Gordon - informed the Colonial Secretary:-

"As compared with the Decennial Census taken in 1881, the increase of the Civil population of the town is 719, which is even more than could reasonably have been expected when it is considered that overcrowding has existed for many years and that building space is very limited. On the other hand stagnation in trade has lately caused emigration to the states of South America to some extent, and numbers of native families have, within the last few years, taken up their residence in the neighbouring town of La Linea on account of its less expensive house rent and the want of accommodation here."

These facts, together with the severe limiting of residence permits, help to explain why the population did not increase appreciably between 1871 and 1931.

Some of the occupations listed in the 1891 Census shed light on Gibraltar's way of life. There were still 29 Goatherds (as opposed to 49 in 1871) and 4 Livery Stable Keepers. Merchants were listed as

	Furniture	15
	Indian Goods	3
	Matting	2
	Gloves	1
Dealers in	Crockery	9
	Moorish Curiosities	8
	Boots and Shoes	3
	Wines, Spirits and Beer	45

There were also 8 Car Proprietors (ie carriages) and 8 Soda Water Manufacturers.

Table IX of that Census demonstrates the overcrowding there was in 1891. For example, there were 37 households where seven people lived in one room, and 88 where seven people lived in two rooms. There were also 58 households where six people lived in one room, and 118 where six people lived in two rooms. The Enumerators for this census were the three Sanitary Inspectors.

## THE TWENTIETH CENTURY

The British Government required a census of the British Empire on or near the 2nd April 1911. The Gibraltar census questionnaire was altered slightly to come into line with the requirements of this census and information on houses, religion and education, not recorded in the 1901 census, was now sought.

In 1921, the enumerators were no longer the Sanitary Inspectors. For the first time the police performed this task. It was a logical move: after all the Police had been keeping records of the population in the town, which was divided into Wards. There were 27 Police Districts in all. In addition, the South District was divided into 11 districts. All together, these districts formed four Wards. North Front and Catalan Bay formed a fifth Ward.

The 1931 Census showed, for the first time, two separate listings on the job side: one was an industry classification and the other an occupational classification. However, one key factor - which was mentioned in the covering report - was that there were 6,000 daily workers coming into Gibraltar from Spain and these did not figure in any of the tables.

No census was taken in 1941, because of the Second World War. A large proportion of the civil population, estimated at about 16,700, was evacuated to the United Kingdom, Madeira, Jamaica and Tangier. This included all women and children. Although the majority of the people returned, some preferred to stay on after the evacuation. The repatriation lasted from April 1944 to early 1951, during which period 15,700 persons returned from the main evacuation centres. This all made the 1951 census more important in establishing actual numbers after the upheavals caused by the war.

Since 1951, the changes in the taking of the census have been slight. No longer is the Registrar of Births the Census Commissioner. In 1951 it was the Director of Labour and Social Security. In 1961 it was the Chief Assistant Secretary. In 1970 and 1981, the Census Commissioner has been Mr. Harry Fell, on secondment from the Overseas Development Administration. The number of Enumeration Areas has increased from 16 Civil districts in 1951, to 20 in 1961, to 64 in 1970 and 1981. The enumerators have also changed. In 1951, the Police were still performing the task. In 1961, it was done by 13 policemen and 7 rent collectors. In 1970 and 1981, the enumerators have been drawn from Departmental office staff.

The 1970 census was a year early. The reason for this was the Spanish Government's closure of the border between Gibraltar and Spain on 9 June 1969, with the consequent sudden withdrawal of the Spanish labour force of 4,666 men who had previously entered Gibraltar daily to work. (They constituted over one-third of Gibraltar's work force). Gibraltar was then finally and totally cut off from Spain, on 26 June, with the suspension of the direct ferry link from Algeciras and the Spanish Government's refusal to allow a British ferry to ply the route. In 1981 the frontier still remained closed.

An additional new factor, since the 1961 census, was that approximately 800 persons previously residing in the neighbouring Spanish area moved into Gibraltar in 1965 as a result of the Spanish restrictions. The 1970 census provided some much-needed information on Gibraltar's population, manpower and employment (including second jobs).

With the 1981 census, the original time rhythm was restored.

TABLE 1. POPULATION 1753 - 1991

YEAR	POPULATION	YEAR	POPULATION
1753	1816	1881	18381
1767	2710	1891	19100
1777	3201	1901	20355
1787	3386	1911	19120
1791	2890	1921	18061
1814	10136	1931	17405
1834	15002	1951	20845
1844	15823	1961	21636
1871	18695	1970	24672
1878	18014	1981	26479
		1991	26703

From 1871 to 1931 inclusive, families of serving members of HM forces were excluded.  
 The definition of population prior to 1871 is not known.

TABLE 2.

## POPULATION BY AGE, SEX AND NATIONALITY

AGE (Years)	GIBRALTARIAN		OTHER BRITISH		MOROCCAN		OTHER		ALL NATIONALITIES		All

POPULATION AND HOUSING CENSUS 1991INSTRUCTIONS TO ENUMERATORSGENERALPersonal Responsibility

(1) You have signed an agreement to act as an enumerator and your appointment as such has been approved by the Governor. You are now responsible for the proper performance of your duties as a Census enumerator in accordance with the provisions of the Census Ordinance, acting under the direction of the Census Commissioner.

Courteous and conciliatory manner essential

(2) Your manner should be courteous and tactful when delivering and collecting the Census' Schedules. When delivering the Schedules and Notice to Householders give any explanations that may be asked for and request the Occupier to ensure that the completed Schedule is ready for collection by Tuesday, 15th October 1991.

Contents of Schedules strictly confidential

(3) The Census Ordinance forbids the disclosure or communication to any person other than the Commissioner and the appointed Census officers of the contents of any Schedule, or of any statistical information acquired by you in the course of your Census duties. Any breach of this instruction is an offence under this Ordinance and can render you liable on conviction to a fine not exceeding £100 and to imprisonment not exceeding six months.

DUTIES BEFORE MONDAY 14TH OCTOBER 1991Study of Instructions, Memorandum Book and Schedules

(4) Read these instructions carefully in conjunction with the Memorandum Book and Schedules. A talk will be given and the notes and explanations on the Schedule will be discussed and each question on the Schedule will be examined in detail. You should then be competent to answer any questions that are put to you and to assist the householder, where necessary, to complete the Schedule. At this talk, or at any time, you should raise any points which are not clear to you.

Enumeration of Households and Institutions, except those enumerated by the Services

(5) The Schedule must include:-

- (a) every member of the household present on the night of the 14th October 1991.
- (b) members of households and institutions absent from the dwelling but were present in Gibraltar and were for example on night duty, or a temporary patient in hospital, etc.
- (c) voluntary members of the Gibraltar Regiment or HMS Calpe.
- (d) permanent members of the Gibraltar Regiment who are not resident in M.O.D. quarters or barracks.

### Enumeration undertaken by the Services

(6) Special arrangements have been made with the Services for the count or enumeration of:-

- (a) servicemen and their families, whether living in quarters, barracks or civilian accommodation.
- (b) permanent members of the Gibraltar Regiment living in M.O.D. quarters or barracks.
- (c) U.K. based civilian employees living in M.O.D. quarters.

### Boundaries and contents of your Enumeration Area

(7) Acquaint yourself with the boundaries and contents of your enumeration area and make certain that you know exactly the area for which you are responsible. If you are in any doubt as to the precise boundaries of the area allocated to you, you should consult the Commissioner or Census officers without delay.

### The Delivery of Schedules

(8) Take particular care to arrange a convenient route by which you can visit every dwelling and enumerate every person within your area and be certain that no occupied premises are omitted.

(9) The code number of your area and the serial or household number must be inserted on the front of each Schedule. Before delivering a Schedule enter, in the space provided, the name and address of the Head of the family or occupier. Enter in the first column of your Memorandum Book the number of the Schedule (if a household requires more than one Schedule enter the same household number on each Schedule but note in your Memorandum Book that you have left two or more Schedules) and complete the remaining columns of the Memorandum Book when you collect the forms.

### Persons who are to receive Schedules

- (10) (a) Every head of a household occupying the whole, or part of a house or flat.
- (b) Every separate lodger occupying a room or rooms in a house or flat NOT BOARDING with a family in the house. (Not boarding should be interpreted as not sharing meals with the occupier or his family).
- (c) Every outdoor servant (with or without family) occupying separately any building, such as a lodge, etc. which is detached from the house to which it belongs or has no internal communication therewith.
- (d) Every proprietor, manager, or head of any hotel, hostel, club, business establishment, school etc., unless the Commissioner has notified you otherwise.
- (e) The head of every institution (such as Hospital, Prison etc.), unless the Commissioner has notified you otherwise.

### The Collection of Schedules

(11) The collection of Schedules MUST begin on Tuesday 15th October, 1991, and be completed by Friday night 18th October, 1991, at the latest.

### Entries in the Memorandum Book at time of collection

(12) You must collect every Schedule that you have delivered and show that you have done so by inserting a tick in the appropriate column of your Memorandum Book. If the occupier has left the premises, you must strike out the name and insert in the column the reason, e.g. "Family left," "Family on Holiday," etc. If no one is occupying the premises, write the address and, in the remarks column write "Vacant".

### Schedules Lost or Omitted to be supplied

(13) Should you find that an occupier had not received a Schedule or that the Schedule delivered had been lost or mislaid you must supply one from your reserve stock and request the occupier or person in charge of the premises to fill it in. If necessary you must enter the particulars yourself. If the schedule is a duplicate to replace a lost schedule, then enter the household number of the original schedule on the duplicate and write in the remarks column of your Memorandum Book "Duplicate". If the occupier had not received a schedule enter the next unallocated household number on the schedule and write "Previously Omitted" in the remarks column of your Memorandum Book.

### Examination of Schedules

(14) On collecting a Schedule examine it carefully and satisfy yourself that it has been correctly and completely filled in.

Form B questions 1 to 9 have to be completed in respect of all persons in the household. Questions 10 to 18 have to be completed only in respect of those members of the household who are in employment, that is those persons with a tick (✓) in box 1 question 9.

### Incomplete or inaccurate information

(15) If the Schedule is incomplete, inaccurate or illegible, you must ask any questions necessary for you to complete or correct it. Make certain that the incorrect tick or entry is clearly crossed out and that the new tick or entry is clearly legible.

Every effort must be made to obtain full particulars but if full particulars cannot be obtained concerning any person, such persons must not on that account be omitted from the Schedule, but the letters "N.K." (Not Known) must be entered against the question(s) for which the information is not obtainable.

### Refusal to fill up the Schedule

(16) Should anyone refuse to fill up the Schedule or answer the questions which you are authorised to ask, draw the attention of any such persons to the instructions to the Occupier contained on the front of the Schedule which states that refusal to give such information makes them liable to a fine of fifty pounds. Should the person still refuse to give information, do not engage in any dispute but write in your Memorandum Book "Information Refused" and report the matter as early as possible to the Commissioner or Census officers.

### Duties after enumeration

(17) After having collected all the Schedules in your area you must as soon as possible, but in no case later than Saturday morning, 19th October, deliver

personally to the Commissioner or Census officers.

- (a) All the Schedules collected by you.
- (b) All unused Schedules.
- (c) Your Memorandum Book.

All completed Schedules must be unfolded and arranged in strict numerical order.

Census Commissioner  
September, 1991.

# 1991 CENSUS OF GIBRALTAR

## NOTICE TO HOUSEHOLDERS

1. A Census of the population of Gibraltar will be taken in respect of all persons present in Gibraltar on the night of MONDAY 14th OCTOBER 1991.
2. The purpose of the Census is to provide information which is useful in formulating policies. Certain facts are required to plan efficiently for the needs of a community or a country. The Government needs information about the population, its age and sex distribution, the skills and qualifications of Gibraltar's manpower, housing conditions and traffic movements. With this information Government can examine Gibraltar's needs, in respect of housing, education, health etc. The statistical information obtained from the Census will also be useful to the business community and academic, social and religious institutions.
3. Each person is required to answer a number of personal questions, and the head of the household in addition is asked to answer questions on housing and specified facilities. It is essential that all answers, where applicable, are entered correctly and legibly.
4. Households which have members away from home on the night of 14th October, for example, on night duty or temporarily ill in hospital etc, should include them on the Schedule. Members of the Gibraltar Regiment who are not living in MOD quarters or barracks should also be included.
5. Special arrangements have been made with the Services for the count or full enumeration of:-
  - a) serving members of the armed forces and their families.
  - b) permanent members of the Gibraltar Regiment and their families living in MOD quarters or barracks.
  - c) U.K. based civilians and their families living in MOD quarters.
6. As far as possible every household will receive a schedule on or before the 11th October 1991, but if by the evening of that date the household has not received a schedule, please notify the CENSUS OFFICE at 51, Line Wall Road (OLD St. George's School - near Amar's Bakery): Tel. 75490.
7. An Enumerator will call for the completed schedule any day between the 15th and 19th October 1991, and will assist if any difficulty has been found in completing the form.
8. Please have the form ready for collection by Tuesday 15th October 1991.
9. Please note that the fine of £100 in the Household Schedule has been quoted in error and should in fact read £50.

## FORM A

### HOUSING NOTES:-

- Question 2 (i) A Government Rented Pre-War Dwelling which has been subsequently structurally modified by the Government should be ticked as a "Post-War" Dwelling.
- (ii) Type 1 is a Private Rented Pre-War Dwelling let at a rent determined by agreement and approved by the Rent Assessor and should be ticked in box 3. Type 2 relates to all other Private Pre-War rent controlled dwellings (i.e. Box 4).
- Question 3 A visitor from abroad is a person in Gibraltar on holiday, or on a business trip or visiting relatives or friends and will be in Gibraltar for only a short period. A boarder is a person who lives with the household and takes a meal or meals with his or her landlady.
- Question 5 Exclude kitchen, bathrooms, corridors and hallways; rooms divided by curtains or portable screens count as one room, those divided by a fixed or sliding partition, count as two rooms.
- Question 16 If two persons from different households have jointly signed a formal contract to move into a new house or flat this involves a move into one and not two houses or flats. The answer to this question allows us to avoid such double-counting.

## FORM B

### NOTES ON PERSONS:-

- Question 2 The Head of the Household should be entered as the 1st Person. Some examples of relationship are: husband or wife, son, daughter, son-in-law, grand-daughter, uncle, boarder.
